

SMO Revised Landing Fee Program to begin August 1, 2005

Santa Monica, CA – 7/12/2005

On June 21, 2005, the Santa Monica City Council implemented a revised aircraft landing fee program for the Santa Monica Municipal Airport (“Airport”) through the adoption of Resolution No. 10047 (CCS). The revised landing fee program for aircraft landing at the Airport sets a uniform landing fee of \$2.07 per thousand pounds of maximum gross landing weight as published by the aircraft manufacturer (revised landing fee schedule is attached).

In recognition of the financial contribution of aircraft based at the Airport to the overall revenue collected by the City, based aircraft are exempt from the revised landing fees. The uniform collection of aviation revenue and landing fees from the entire fleet of aircraft using the Airport will address the goal of the Airport and the Federal Aviation Administration (“FAA”) of financial self-sufficiency and the availability of a stable source of funding to enhance the safe and compatible operation of the Airport.

The revised aircraft landing fee program addresses the concerns and interests raised by all the parties in the proceeding filed with the FAA under 14 C.F.R., Part 16 (“Part 16”) by the National Business Aviation Association, Inc. (“NBAA”), Bombardier Aerospace Corp. (“Bombardier”) and Dassault Falcon Jet Corp. (“Dassault”) against the City. (FAA Part 16 Docket No. 16-03-11). The revised landing fee program resolves two years of uncertainty arising from the pendency of the Part 16 proceeding. The implementation of the revised program on August 1, 2005 will enable to the City to continue its capital improvements program in a manner that permits the continued safe and compatible operation of the Airport’s facilities.

The key elements of the revised landing fee program are:

- Revised Landing Fee Program to Begin August 1, 2005.
- The uniform landing fee rate is \$2.07 per 1,000 lbs of maximum gross landing weight as certified by the aircraft manufacturer (see attached landing fee schedule).
- Aircraft based at the Santa Monica Municipal Airport will be exempt from paying landing fees upon demonstration that the aircraft was based at the Airport for the 30 day period prior to the imposition of the landing fee.
